Accountability	<p>To manage and organise the workload of his/her design team to ensure that time and financial targets as set out in various programmes or by instruction from the Asset & Design Manager are met.</p> <p>To monitor the performance of his / her design teams within parameters as set out by the Asset & Design Manager and report to that person as specified.</p> <p>To ensure that the Service complies with all relevant current legislation, policies and procedures with regard to the workload and advise others where necessary of their legal duties when carrying out construction work on their behalf.</p>
Contractual Terms Associated with the Post	N/A

Duties and Responsibilities

- To carry out various surveys, feasibility studies, designs, assessments, reports and the like in the process of preparing highway structural and civil engineering schemes and the like as required by the Design Manager.
- To set up, manage and maintain databases of highway and coastal assets on behalf of the relevant County and/or Trunk Road client.
- To carry out all surveys and inspections necessary to populate and maintain those databases through monitoring the condition of those assets to the relevant code of practice.
- To gather all data required to assess the condition of those assets to enable them to be assessed on condition for comparison purposes and prioritisation.
- To generate programmes by prioritising minor and major maintenance, upgrades and renewals of those assets and provide remedial works estimates for the relevant budget holders
- To procure all works essential to maintain the condition of those assets in accordance with the relevant County Council specification and Council standing orders.
- To take responsibility for budgets delegated by the service for the purpose of monitoring and maintaining their highway/coastal assets.
- To delegate workloads to members of the design team ensuring the efficient use of resources. To ensure that the output of all members of the team is to current standards and fulfils the requirements of the service.
- To liaise with site inspectors and supervisors, members of the public, contractors, consultants and the like as and when required.
- To ensure all the Health and Safety requirements of the Council including the Construction (Design and Management) Regulations are achieved. To undertake the role of "Principal Designer" under the CDM Regulations.
- To assist in the preparation of the CCC Draft Capital Programme (Highways Maintenance) and the preparation, implementation and control of the relevant budget.
- To assist in the preparation of the CCC Draft Revenue Programme (Highways Maintenance) and the preparation, implementation and control of the relevant budget.
- To deputise for the Design Manager as required, and represent the Service both within the Council and external to the Council.
- To assist in the preparation and control of the delegated budget in respect of various external grant awards.
- To represent the Service as directed on Technical Services Functions, both within the Council and external to the Council, including meetings with elected members, other services, the Welsh Government, the regional Transport Consortia and similar.
- To contribute towards the development of operational partnerships and framework agreements with other service providers and/ or Councils were appropriate.
- To facilitate the Council's performance management and appraisal system for staff under her / his control.
- To promote the work of the Service by publicity, information and presentations, utilising all forms of information technology.

The post holder will be expected to adopt a flexible attitude to the duties which may have to be varied (after discussion with the post holder) subject to the needs of the service and in keeping with the general profile of the post.
